

GT40 Build Bench

2 x 2 tube using Harbor Freight casters.
19" build height with clearance for most
engine hoists.

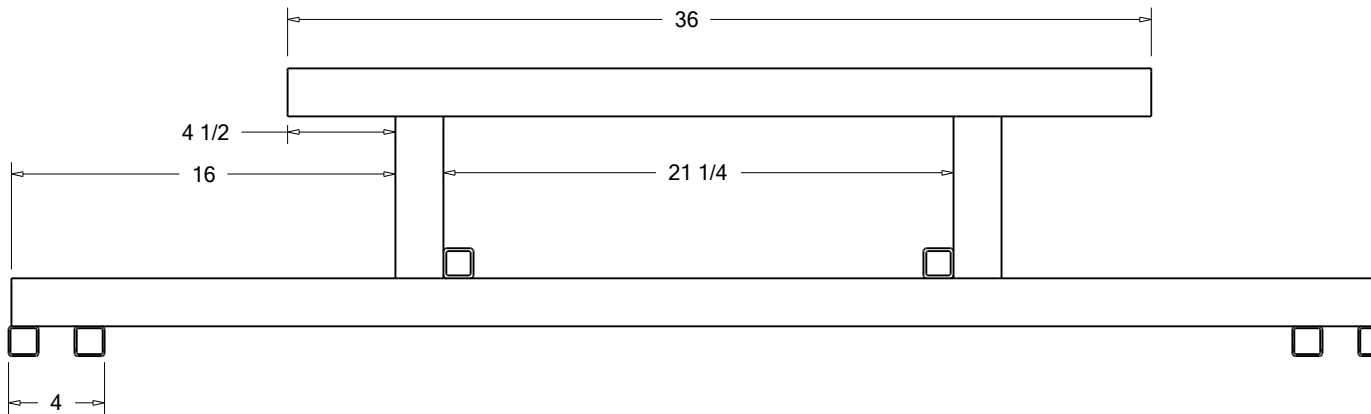

Shelving could be added around perimeter

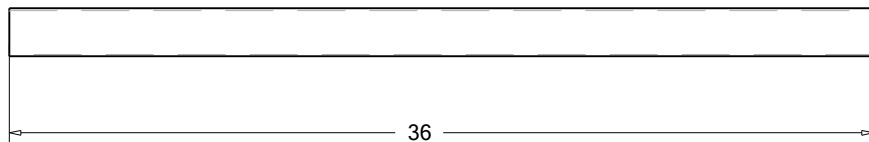

Upper supports are within perimeter of
chassis underside so as to not interfere
with rocker panels or suspension

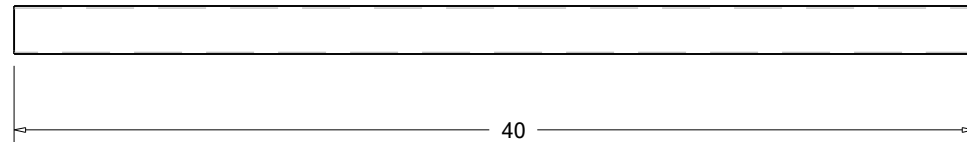

Front and Rear dollies are the same
except for length and position of upper tube

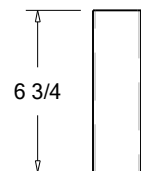

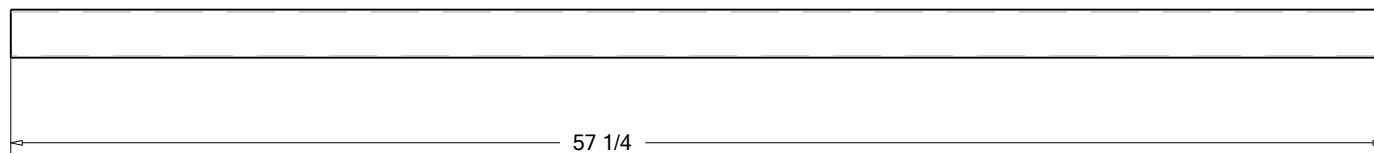

Front Top Cross Tube
2 x 2 x .083 wall steel tube
